

**Teaching for Rigor, Relevance
and Relationships
in Career and Technical Education**

The New 3 R's: Rigor, Relevance and Relationships

Two-Day Conference, February 8-9, 2006

Chamber of Commerce, 800 W. Dakota Ave., Pierre, SD

8:30 a.m. – 4:30 p.m.

“Teaching is a craft practiced by skilled professionals, not an exact science in which any person can follow a standard recipe that guarantees success.”

Instead of relying solely on trial and error, this workshop will provide training and resources that will:

- ✦ create opportunities for continuous improvement
- ✦ provide new and creative instructional strategies
- ✦ help you create effective learning experiences
- ✦ strengthen your professional repertoire
- ✦ help you make better decisions about material presentation
- ✦ lead to more motivated and engaged students
